PROFILE

MERN Stack Developer with experience in building responsive web apps using MongoDB, Express.js, React.js, and Node.js. Skilled in JavaScript, Tailwind CSS, and Bootstrap, with a passion for clean, scalable code.

PROJECTS

- MusicHub  , Role-Based Music & Video Sharing Platform (MERN Stack Project)

Feb 2026 – Present

 - Modern UI built with React, Tailwind CSS, and React Router
 - Secure authentication using JWT + HTTP-only cookies with session persistence
 - Role-based system (artist/user) with protected routes & access control
 - Media upload system for music/videos using ImageKit
 - Scalable RESTful API architecture with Express & Node.js
- RaSuAI  , AI Voice Assistant

Jan 2026 – Feb 2026

 - Built a full-stack AI voice assistant using MERN stack and Gemini API.
 - Implemented user authentication with signup/login.
 - Allowed users to customize AI name and profile image for a personalized experience.
 - Designed responsive and interactive UI for smooth voice-based interactions.
- SearchMedia  , React-Based Media Search App with API Integration

Nov 2025 – Dec 2025

 - Built a React web app for searching photos, videos, and GIFs using Unsplash, Pexels, and Tenor APIs.
 - Managed state with Redux Toolkit and saved favorites using LocalStorage.
 - Implemented routing with React-Router-Dom for smooth navigation and user-friendly experience.
- Wanderlust  , Full-Stack Home & Room Listing Platform

Apr 2025 – Oct 2025

 - Built a full-stack home and room listing web app using Node.js, Express.js, MongoDB, EJS, and Bootstrap.
 - Developed RESTful APIs for listings, bookings, user reviews and rating.
 - Implemented secure user authentication with Passport.js.
 - Created a responsive and dynamic UI using EJS templates and Bootstrap.
 - Followed MVC architecture for clean and maintainable code.
- Personal Portfolio  , React-Based Developer Portfolio with GSAP Animations

Aug 2024 – Oct 2024

 - Built a personal portfolio website using React.js to showcase projects, skills, and professional journey.
 - Designed a responsive layout with GSAP animations..
 - Highlighted work, skills, and contact links for easy access.

SKILLS

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Bootstrap, JavaScript (ES6+), GSAP (GreenSock Animation Platform)	Backend: Node.js, Express.js, RESTful APIs
Database: MongoDB, Mongoose, MySQL	Cloud Storage: Cloudinary, ImageKit
Hosting & Deployment: Vercel, Render	Tools & Platforms: Git, GitHub, VS Code, Postman, ChatGPT
